OT, ICS & IT NETWORK SPECIALISTS

Services & Solutions

Full-stack OT/ICS engineering — from cybersecurity and compliance to network design, UC, wireless, cabling and 24/7 monitoring — delivered by certified specialists with our LANAWARE™ private-cloud platform.

01
Cybersecurity — IT, OT & ICS

Industrial cybersecurity engineered for production environments. Risk assessments, network segmentation, threat detection and continuous monitoring — aligned to **NERC CIP**, **NIST SP 800-82** and **IEC 62443**.

NERC CIP · NIST 800-82 · IEC 62443 · Risk Assessment · Threat Detection

02
24/7 Network Monitoring

Round-the-clock visibility across your **IT, OT and SCADA** Industrial Data Centre (IDC). SCADA-aware monitoring and modern alerting — backed by our private NOC and SLA-driven response.

IT / OT / SCADA · IDC · SLA Response · Private NOC · Modern Alerting

03
OT Network Engineering

ICS network design and **segmentation** to **IEC 62443**. Purdue-model architecture, zones & conduits, core-to-cell deployment by engineers who speak both IT and OT.

ICS Design · Purdue Model · Zones & Conduits · IEC 62443 · Segmentation

04
Unified Communications — Cisco Certified

Cisco Certified UC across **on-prem, cloud and hybrid** — **CUCM (Call Manager), Unity, IM&P, Jabber, Webex Calling/App, UCCX, Expressway, CUBE. MS Teams** & 3rd-party integration; PBX → **UCaaS** migrations.

Cisco Certified · CUCM · Webex Calling · MS Teams · PBX → UCaaS

05
Wireless Surveying, Design & Implementation

Indoor and outdoor wireless for plant and industrial environments. Predictive, passive and active site surveys, RF design, AP placement and full deployment — survey to commissioning.

Indoor & Outdoor · Site Surveys · RF Design · AP Placement · Plant-Grade

06
Structured Cabling

Fibre and copper structured cabling. **IDF/MDF** layouts, cabinet design and elevation drawings, termination, certification and labeling — to industrial standards.

Fibre & Copper · IDF / MDF · Elevations · Certification

07
Virtualization — Design & Implementation

Plant-grade virtualization for OT and IT workloads. Full **VM, Hypervisor** and **Docker** design and deployment on our **Managed Virtualization Engine (MVE)** — or the platform of your choice.

VM · Hypervisor · Docker · MVE · Plant HA

08
LANAWARE™ Suite

Our flagship private-cloud platform — one pane of glass for OT **Assessments, Discoveries, Compliance, NMS, Backups (ECHO)** and **Security Central**. On-prem, hosted, or fully air-gapped.

SEE PAGE 2 →

OFFER 08 — FLAGSHIP PLATFORM

LANAWARE™ Suite

Our private-cloud platform purpose-built for OT operations — one pane of glass for assessments, monitoring, backup and security. Delivered from our own data centre, on-premises, or fully air-gapped.

Assessments & Discoveries

Asset discovery and fingerprinting, traffic studies, network and security baselining for OT and ICS environments.

Compliance

Continuous IEC 62443 / NIST / NERC CIP posture, audits and reporting — aligned to your regulatory framework.

NMS & Monitoring

24/7 IP / SNMP / SCADA monitoring, visual maps and modern alarm integrations (Teams, WhatsApp, email).

Backups — ECHO

Network backup and disaster recovery — on-node, on-premises or to your storage, with snapshots and versioning.

Security Central

Real-time security posture, vulnerability triggers, log correlation and per-asset mitigation across your fleet.

Private Cloud Delivery

Hosted in our own redundant data centre — or deployed on-premises and air-gapped at your site. No public cloud.

TECHNOLOGY PARTNERS & PLATFORMS

Cisco Premier Partner · Express Collaboration Specialization · multi-vendor across networking, security, virtualization & data protection

CISCO	MERAKI	MICROSOFT	VMWARE	NUTANIX	FORTINET	VEEAM
PROXMOX	DELL	NETAPP	LENOVO	HPE	PALO ALTO	UBIQUITI
